This is a great game for little kids. *Local Multiplayer*! Unlimited lives, each level is really fun and lots of cool stuff to discover. Multiply player is great and some things require co-operation. One thing to note is that players can hit each other and steal gold, which can be frustrating if taken advantage of, but otherwise is really funny (pick up the player and throw him!). I have two remotes and play with my 3 and 4 year old. It seems like you can play up to 4 people. The game crashes (took down

Windows too) if you disconnect or reconnect a remote with the game running, but has been stable other than that. The menus are a little hard for kids until they learn the pictures and then they're off to the races. Tons of fun. If you're looking for a kids game this is a good one.. the game is ridiculously fun to play with friends! only down side is that it keeps crashing.. would love to give this a big thumbs up because the game itself is good , my two daughters and i play it but for some strange reason the game wont load save game and says contact system admin to correct issue, so for that i give it a thumbs down. Crashes shortly after the intro. Have tried numerous times to get it to work, but it doesn't :(Total waste of money.. Love this game! Been playing non stop for the last few days. It's nothing serious nor does it require much thought which is I guess part of it's charm. Just a cute little game to zone out with.. This was one of my favourite games growing up. Although I absolutely hate the game controls on PC, I reccomend going to your local gamestop and picking up a copy for your Wii or PS 3. I've seen it at almost every gamestop for relatively cheap. However if you're not a huge disney fan such as myself, I don't reccomend this game.. I bought this game due to having previously played it on the PS3, and wanting to get back into playing it. Having done so, I've been reminded of how utterly charming it is to play. Granted, the PC controls didn't initially sit well with me and I still find them rather awkward, but after a while, I've managed to get the hang of it. One thing I have noticed is that when I try playing with my PS4 controller the game refuses to open (or rather, it seems to fail). And when I did manage to get the game working with the controller, it timed out during gameplay, leaving me powerless and unable to control my character. Furthermore, for a PS4 controller the game seems to give its instructions as if I plugged in an XBOX controller. It's easy to work around, but a slight annoyance nonetheless. I guarentee that you'll love this game if you're a fan of Disney. Just get through the controls and you'll be fine. It's bright, colorful and everything in it's pretty fun in general. It may feel a little repetitive (especially considering you'll have to play through each stage twice to get both costumes from each one) but trust me, it's a blast. One thing I would like though is for the DLC packs they had for the console versions to be brought over; the Phineas & Ferb and Neverland levels, and the Disney Villains and Muppet costume packs. Particularly the former two, though, for it helps add to the game. I'm not too fussed about this though, honestly, since it doesn't take anything away from my enjoyment of the game.
